JOURNAL OF THE

AUDIO ENGINEERING SOCIETY

SUBJECT AND AUTHOR INDEX

VOLUME 22-1974 NUMBERS 1-10

SUBJECT INDEX

ACOUSTICS

The Acoustical Effect of Various Factors on the Frequency Response of a Hearing Aid—Gerald A. Studebaker, 22:5, p. 329

Design Considerations for a Demountable Concert Enclosure (Symphonic Shell) (Reprint)—Christopher Jaffe, 23:3, p. 163

Electronic Reverberation Equipment in the Stockholm Concert Hall (PN)—Stellan Dahlstedt, 22:8, p. 627

An Environmental Noise Classifier and Its Use—Jerry Donovan, 22:7, p. 528

Equalization Simplified (PN)—Harro K. Heinz, 22:9, p. 700

High-Fidelity Sound System Equalization by Analysis of Standing Waves—Allen R. Groh, 22:10, p. 795

Mine Mark 24: World War II Acoustic Torpedo—Mark B. Gardner, 22:8, p. 614

A Self-Contained Instrument for Sound-System Equalization—G. R. Thurmond, 22:9, p. 695

Speech Acoustics for the Theatre (Reprint)—David L. Klepper, 22:1, p. 15

AUDIO CIRCUITS

Electret Microphone and Preamplifier Combination for Experimental Telephone Handset Use (PN)—J. R. Nelson, 22:2, p. 100

Low-Cost Comb Filter Methods (PN)—Ralph W. Burhans, 22:5, p. 335

LSI Reality in Consumer Electronics (PN)—David A. Jones, 22:1, p. 22

More About "Tubes Versus Transistors" (F)—Roy H. Trumbull, 22:1, p. 24

Noise Behavior of Paralleled Linear Amplifiers—T. Ken Matsudaira, 22:8, p. 602

Power Output for Speech Reinforcement Amplifiers (F)—Daniel Queen, 22:7, p. 535

Practical Considerations of Active Filter Design—Phillip E. Allen, 22:10, p. 770

A Program-Controlled Noise Filter—Robert Orban, 22:1, p. 2

A Quasi-Linear Frequency Divider (PN)—Robert W. Byren, Nikolai Eberhardt, and John W. Steckel, 22:8, p. 632

Reply to "More About Tubes Versus Transistors" (F)—R. S. Mintz, 22:1, p. 24

Transient Intermodulation Distortion in Commercial Audio Amplifiers (PN)—Matti Otala and Raimo Ensomaa, 22:4, p. 244

Tubes Versus Transistors: A Further Comment (F)—W. J. J. Hoge, 22:5, p. 338

BROADCASTING

QFMX—Quadruplex FM Transmission Using the 4-4-4 QMX Matrix System—Duane H. Cooper, 22:2, p. 82

AES CONVENTIONS

47/74 Convention Report—22:4, p. 252

Audio Charisma Turns on in L.A.—22:5, p. 340

49th Convention Report—22:9, p. 706

DIGITAL TECHNIQUES

An Investigation of Quantization Noise (PN)—Barry Blesser, 22:1, p. 20

DISC RECORDING and REPRODUCTION

The CD-4 Mark-II Modulation System—Yasumori Kokubun, Sadahiko Muramoto and John M. Eargle, 22:6, p. 416

A Long-Life Sapphire Stylus for Discrete Quadraphonic Discs—Takeshi Nagai, Kiyotaka Wasa and Shigeru Hayakawa, 22:7, p. 521

Long-Term Durability of Pickup Diamonds and Records (PN)—Friedrich A. Loescher and Frank H. Hirsch, 22:10, p. 800

Measurement of Phonograph Cartridges by the Pulse-Train Method—Teruo Muraoka, Hideo Onoye and Akio Takayanagi, 22:7, p. 502

Measurement of Recorded Level and Channel Separation in Phonograph Discs Using Optical Interferometry Tech-

niques (PN)—T. Inoue, I. Owaki, K. Ohba, S. Nakamura and John Eargle, 22:9, p. 704

New Methods of Automated Flutter Analysis—K. O. Bader and Barry Blesser, 22:2, p. 88

Performance Tradeoffs in Disk Recording—James V. White, 22:10, p. 789

ELECTRONIC MUSIC and SOUND SYNTHESIS

Low-Cost Comb Filter Methods (PN)—Ralph W. Burhans, 22:5, p. 335

Walsh Functions in Waveform Synthesizers—E. Insam, 22:6, p. 422

EDITORIALS

An Outline of Plans Present and Future—John M. Eargle, 22:9, p. 738

Outward and Upward with AES—22:2, p. 110

In Pursuit of Significant Technical Papers—John J. Bubbers, 22:6, p. 432

A Rosetta Stone for Audio?—Richard C. Heyser, 22:4, p. 251

Whither? (Message from the President)—John J. Bubbers, 22:1, p. 46

EDUCATION in AUDIO

Audio Arts for Non-Engineers (F)—Ralph W. Burhans, 22:6, p. 430

DeVry Helps Fill a Void (F)—David J. Pastrino, 22:3, p. 186

Good Schools Never Die; They Just Change Their Names (F)—Waldemar Horizny, 22:8, p. 638

Reply to Messrs. Wilson and Wilson: A Commentary on Audio Education (F)—Paul S. Moverman, 22:2, p. 103

Still More on "Still More on Audio Education" (F)—John Woram, 22:2, p. 102

ENGINEERING AIDS

An Interpolator for Reading Plots in Technical Journals (Reprint) (F)—Robert L. Wolke, 22:1, p. 28

FOUR-CHANNEL RECORDING

On Aural Phase Detection: Part I—Villy Hansen and Erik Rorbaek Madsen, 22:1, p. 10

On Aural Phase Detection, Part II—Villy Hansen and Erik Rorbaek Madsen, 22:10, p. 783

The CD-4 Mark-II Modulation System—Yasumori Kokubun, Sadahiko Muramoto and John M. Eargle, 22:6, p. 416

A Long-Life Sapphire Stylus for Discrete Quadraphonic Discs—Takeshi Nagai, Kiyotaka Wasa and Shigeru Hayakawa, 22:7, p. 521

On Phase Difference and Sound Image Localization (F)—Takeshi K. Matsudaira and Takeshi Fukami, 22:3, p. 186

The Presentation of Statistical Information on a Circle (F)—Michael A. Gerzon, 22:7, p. 536

QFMX—Quadruplex FM Transmission Using the 4-4-4 QMX Matrix System—Duane H. Cooper, 22:2, p. 82

LOUDSPEAKERS

The Application of Holography in the Analysis of Vibrations of Loudspeaker Diaphragms (PN)—Jan Hladky, 22:4, p. 247

Correlation Between Subjective and Objective Data for Quality Loudspeakers—Henrik Staffeldt, 22:6, p. 402

Equalization Simplified (PN)—Harro K. Heinz, 22:9, p. 700

Geometrical Considerations of Subjective Audio—Richard C. Heyser, 22:9, p. 674

The Influence of Room Boundaries on Loudspeaker Power Output—Roy F. Allison, 22:5, p. 314

Low-Frequency Loudspeaker Assessment by Nearfield Sound-Pressure Measurement—D. B. Keele, Jr., 22:3, p. 154

More on the Measurement of the Directivity Factor (F)—Geoffrey L. Wilson, 22:3, p. 180

The Post Ultimate LSH Loudspeaker (F)—I. Rogue Acoustin, 22:5, p. 338

Passive-Radiator Loudspeaker Systems Part I: Analysis—Richard H. Small, 22:8, p. 592

Passive-Radiator Loudspeaker Systems, Part II: Synthesis—Richard M. Small, 22:9, p. 683

A Self-Contained Instrument for Sound-System Equalization—G. R. Thurmond, 22:9, p. 695

A Tabular Tuning Method for Vented Enclosures (PN)—D. B. Keele, Jr., 22:2, p. 97

The Ultimate LSH Loudspeaker (F)—O. Gadfly Hertz, 22:2, p. 106

On "The Ultimate LSH Loudspeaker" (F)—D. David Decibel, 22:5, p. 339

On "The Ultimate LSH Loudspeaker" (F)— Joel Tall, 22:5, p. 339

On "The Ultimate LSH Loudspeaker" (F)—Dale B. Watts, 22:5, p. 339

MEASURING and TEST EQUIPMENT

The Application of Holography in the Analysis of Vibrations of Loudspeaker Diaphragms (PN)—Jan Hladky, 22:4, p. 247

An Environmental Noise Classifier and Its Use—Jerry Donovan, 22:7, p. 528

Equalization Simplified (PN)—Harro K. Heinz, 22:9, p. 700

Field-Type Acoustic Wattmeter—Harry F. Olson, 22:5, p. 321

Geometrical Considerations of Subjective Audio—Richard C. Heyser, 22:9, p. 674

High-Fidelity Sound System Equalization by Analysis of Standing Waves—Allen R. Groh, 22:10, p. 795

Low-Frequency Loudspeaker Assessment by Nearfield Sound-Pressure Measurement—D. B. Keele, Jr., 22:3, p. 154

Measurement of Phonograph Cartridges by the Pulse-Train Method—Teruo Muraoka, Hideo Onoye and Akio Takayanagi, 22:7, p. 502

Measurement of Recorded Level and Channel Separation in Phonograph Discs Using Optical Interferometry Techniques (PN)—T. Inoue, I. Owaki, K. Ohba, S. Nakamura and John Eargle, 22:9, p. 704

Measurements of Biophysiological Signals in the Audio Spectrum (PN)—Lawrence Zucker, 22:10, p. 806

More on the Measurement of the Directivity Factor (F)—Geoffrey L. Wilson, 22:3, p. 180

New Methods of Automated Flutter Analysis—K. O. Bader and Barry Blesser, 22:2, p. 88

A Self-Contained Instrument for Sound-System Equalization—G. R. Thurmond, 22:9, p. 695

Sources of the Constant Volume Velocity and Their Use for Acoustic Measurements—Tomas Salava, 22:3, p. 146

Transient Intermodulation Distortion in Commercial Audio Amplifiers (PN)—Matti Otala and Raimo Ensomaa, 22:4, p. 244

MICROPHONES

Electret Microphone and Preamplifier Combination for Experimental Telephone Handset Use (PN)—J. R. Nelson, 22:2, p. 100

Subminiature Directional Microphones—Elmer V. Carlson and Mead C. Killion, 22:2, p. 92

A Subminiature Electret-Condenser Microphone of New Design—Mead C. Killion and Elmer V. Carlson, 22:4, p. 237

NOISE and VIBRATION

An Environmental Noise Classifier and Its Use—Jerry Donovan, 22:7, p. 528

PSYCHOACOUSTICS and BIOACOUSTICS

On Aural Phase Detection: Part I—Villy Hansen and Erik Rorbaek Madsen, 22:1, p. 10

On Aural Phase Detection, Part II—Villy Hansen and Erik Rorbaek Madsen, 22:10, p. 783

Comments on "The Delay Plane, Objective Analysis of Subjective Properties: Part I" (F)—Michael A. Gerzon, 22:2, p. 104

Correlation Between Subjective and Objective Data for Quality Loudspeakers—Henrik Staffeldt, 22:6, p. 402

Geometrical Considerations of Subjective Audio—Richard C. Heyser, 22:9, p. 674

Measurements of Biophysiological Signals in the Audio Spectrum (PN)—Lawrence Zucker, 22:10, p. 806

On Phase Difference and Sound Image Localization (F)—Takeshi K. Matsudaira and Takeshi Fukami, 22:3, p. 186

The Presentation of Statistical Information on a Circle (F)—Michael A. Gerzon, 22:7, p. 536

Reply to Comments on "The Delay Plane" (F)—Richard C. Heyser, 22:2, p. 105

RECORDING STUDIO EQUIPMENT

Missed Connection (F)—R. N. Goodman, 22:3, p. 186

Rocks of Gibraltar (F)—Roy H. Trumbull, 22:6, p. 430

SOUND SYSTEMS

Electronic Reverberation Equipment in the Stockholm Concert Hall (PN)—Stellan Dahlstedt, 22:8, p. 627

Equalization Simplified (PN)—Harro K. Heinz, 22:9, p. 700

High-Fidelity Sound System Equalization by Analysis of Standing Waves—Allen R. Groh, 22:10, p. 795

Power Output for Speech Reinforcement Amplifiers (F)—Daniel Queen, 22:7, p. 535

A Self-Contained Instrument for Sound-System Equalization—G. R. Thurmond, 22:9, p. 695

SPEECH and HEARING

The Acoustical Effect of Various Factors on the Frequency Response of a Hearing Aid—Gerald A. Studebaker, 22:5, p. 329

Effects of Spectral Weighting of Speech in Hearing-Impaired Subjects—Ian B. Thomas and Barry Pfannebecker, 22:9, p. 690

Hearing Damage from Music—United Kingdom Experience—Alex Burd, 22:7, p. 524

Intelligibility Enhancement of Already Noisy Speech Signals—Ian B. Thomas and A. Ravindran, 22:4, p. 234

Smoothing the Hearing Aid Frequency Response—E. V. Carlson, 22:6, p. 426

Speech Acoustics for the Theatre (Reprint)—David L. Klepper, 22:1, p. 15

STANDARDS

Comments on "The Delay Plane, Objective Analysis of Subjective Properties: Part I" (F)—Michael A. Gerzon, 22:2, p. 104

More on the Measurement of the Directivity Factor (F)—Geoffrey L. Wilson, 22:3, p. 180

Reply to Comments on "The Delay Plane" (F)—Richard C. Heyser, 22:2, p. 105

A Rosetta Tone? (F)—Don Davis, 22:6, p. 430

On a "Rosetta Stone" for Acoustic Recordings (F)—Michael A. Gerzon, 22:8, p. 638

TAPE RECORDING and REPRODUCTION

On Considerations in the Development of an Advanced Fe_2O_3 Cassette Tape Coating (F)—F. J. Sischka, 22:3, p. 186

Dropout Identification and Cleaning Methods for Magnetic Tape—D. E. Comstock, R. D. Misner, E. A. Roberts and R. E. Zenner, 22:7, p. 511

The Legal Aspects of Magnetic Tape Recordings—Hugh D. Ford, 22:4, p. 226

New Methods of Automated Flutter Analysis—K. O. Bader and Barry Blesser, 22:2, p. 88

Optimizing Tape Transport Motion Control Using Operational-Amplifier Analog Signal Processing (PN)—James C. Strickland, 22:3, p. 172

A Rosetta Tone? (F)—Don Davis, 22:6, p. 430

On a "Rosetta Stone" for Acoustic Recordings (F)—Michael A. Gerzon, 22:8, p. 638

AUTHOR INDEX

Acoustin, I. Rogue—The Post Ultimate LSH Loudspeaker (F), 22:5 p. 338

Allen, Phillip E.—Practical Considerations of Active Filter Design, 22:10, p. 770

Allison, Roy F.—The Influence of Room Boundaries on Loudspeaker Power Output, 22:5, p. 314
